Town of Hector Climate Adaptation Plan

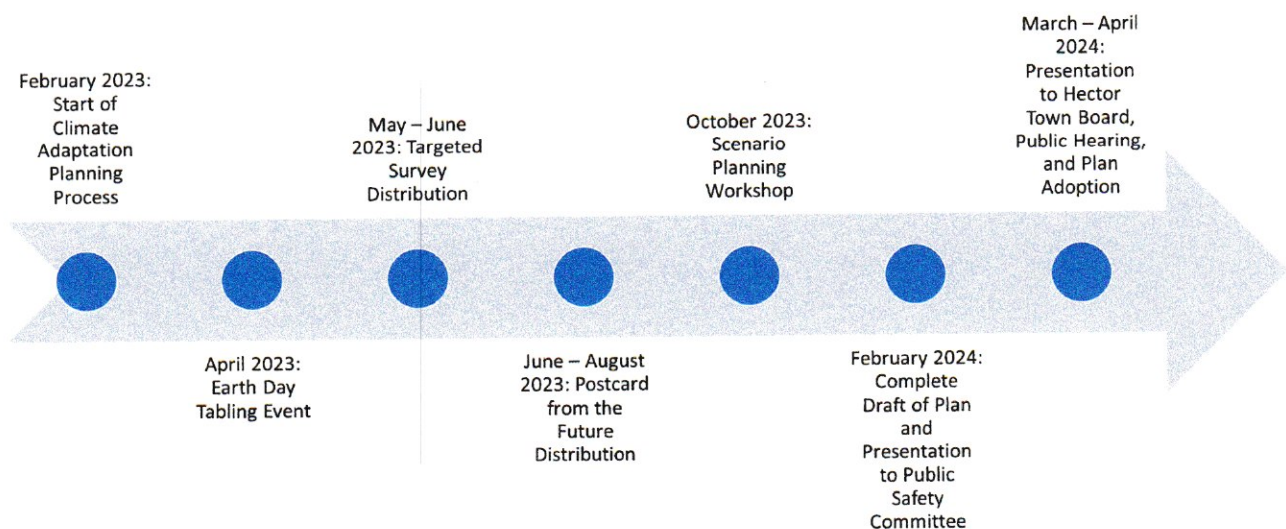

Executive Summary

What is a Climate Adaptation Plan?

The climate adaptation planning process is about **helping communities address and adapt to change, both minor and transformative**. A climate adaptation plan is significantly different from other types of plans because it includes addressing current and future uncertainties, the unpredictability of complex social and ecological systems, and the unknowns of current and future climate change dynamics, including how and when policy makers will implement climate change policies and the public will shift behaviors. It includes addressing climate-enhanced hazards, other significant climate-influenced changes already underway, and even new opportunities under climate change. This plan will address three climate hazards the Hector Sustainability Committee identified as the most significant in the Town – ***flooding, severe storms (wind storms, ice storms, etc.) and drought***.

The Town of Hector strove to complete the climate adaptation planning process in an inclusive way through public participation and utilized exploratory scenario planning as an anticipatory tool. The hope is that this plan provides guidance to the Town as it adapts to a changing climate into the future.

Plan Development Timeline

Place Narrative

The first section of the Town of Hector Climate Adaptation Plan consists of a place narrative. This narrative includes information about demographics, the economy, housing, energy use, physical infrastructure assets, critical facilities, community facilities, and agricultural districts. The purpose of the place narrative is to utilize data from sources such as the U.S. Census and American Community Survey to provide a snapshot of the present and recent past to provide one of the building blocks to develop recommendations for the future.

Public Engagement Strategy and Results

The Town of Hector Sustainability Committee conducted a public engagement strategy for the Town of Hector Climate Adaptation Plan utilizing a three-pronged approach. The first prong involved a booth staffed with Sustainability Committee members at the annual Earth Day event in April. The second prong involved a targeted survey to the stakeholder groups identified on the next page. Each Sustainability Committee member was tasked with finding members of certain stakeholder groups to take the survey. Finally, the third prong was a public engagement exercise called “Postcard from the Future”. Stamped postcards were distributed at various community events with the following, “The year is 2050 and the Town of Hector has met its climate goals and adapted to increased flooding and frequency of severe storms. You are writing a postcard from your future self to your current self in 2023. What changes took place to enable your community to meet its goals and adapt to these climate hazards? What does your community look like in 2050?”

Scenario Planning

There are two types of scenario planning, **normative** and **exploratory**. Normative scenario planning creates one desired future state with scenarios developed as potential ways to reach this future state. Exploratory scenario planning creates multiple scenarios to reflect possible future states and tries to navigate future uncertainties. The Town of Hector conducted **exploratory scenario planning** as part of the climate adaptation planning process. Southern Tier Central Regional Planning & Development Board developed scenarios to be discussed alongside the Hector Sustainability Committee at a workshop in October 2023. Results from this workshop contributed to the development of plan recommendations. Full detailed information on the scenario planning exercise can be found in Appendix B.

Recommendations and Implementation Strategy

Utilizing the information gathered over the course of the planning process, the Hector Sustainability Committee developed recommendations for residential property owners, small businesses/commercial property owners, agricultural producers, and local government. These recommendations were then prioritized as short-term, medium-term, and long-term recommendations for implementation. The summary tables with recommendations and implementation timeline for local government is below.

Local Government

Short-Term Recommendations	Medium-Term Recommendations	Long-Term Recommendations
<ul style="list-style-type: none"> • <i>Take action to mitigate climate change effects on public water system, roads, and other Town infrastructure.</i> • <i>Research and apply for grants to fund climate adaptation efforts.</i> • <i>Conduct public outreach on actions to take in an emergency, establish an emergency preparedness point person for the Town, and establish an emergency response contact person for the Town.</i> • <i>Equip Valois-Logan-Hector Fire Department, Burdett Fire House, and Mecklenburg Fire Station as emergency shelters, heating centers, and cooling centers.</i> 	<ul style="list-style-type: none"> • <i>Work with Schuyler County Office for the Aging to expand services in the Town.</i> • <i>Evaluate ditch maintenance activities to ensure proper road drainage, while reducing erosion, sedimentation into waterways, and highway accidents due to overly deep ditches.</i> • <i>Create a volunteer fixing-up/clean-up committee to assist Town residents with clean up in the aftermath of severe climate events.</i> 	<ul style="list-style-type: none"> • <i>Conduct educational events about climate adaptation, resilience, and mitigation efforts.</i> • <i>Increase youth participation in climate action at the Town level.</i>

Concluding Remarks and Evaluation Strategy

During the 2023 year, the Town of Hector Sustainability Committee has worked diligently in collaboration with Southern Tier Central to develop a climate adaptation plan for the Town that provides tangible, actionable, recommendations for the future. It is the hope that this plan can provide guidance to local elected officials, residential property owners, small businesses/commercial property owners, and agricultural producers as the Town and its residents adapt to change and face climate-related challenges moving forward. As future climate impacts become apparent and times change, it will be necessary to review and update the plan. Therefore, the Town of Hector Sustainability Committee will review and recommend plan updates/revisions to the Hector Town Board every five (5) years.

	ID#7839	

- For the purpose of maintaining the equipment listed above in efficient condition, the Client hereby authorizes EBE/CMS Imaging Solutions and their representatives to furnish mechanical service, including adjustments on this equipment, subject to the following terms:
- This agreement shall remain in effect for successive twelve month periods or for a maximum number of copies as shown below.
 - Payment of invoices is required by starting date on contract. Non-payment constitutes cancellation. After cancellation, all work will be performed on a chargeable basis.
 - EBE/CMS will provide, at no additional charge, labor and parts which have become worn or broken through normal use and are necessary for servicing and maintenance adjustments. Parts damaged by misuse or carelessness and parts and labor required after the expiration of this agreement will be supplied to the client at the current retail price for that item, and current hourly rate for labor.
 - This agreement shall not apply to repairs made necessary by accident, misuse or abuse, neglect, theft, riot, vandalism, electrical power failure, fire, water or other acts of God, or damage caused by service personnel or supplies other than those supplied by EBE/CMS, or damage caused by the installation of the wrong supplies into the machine. Charges made necessary by the foregoing will be the responsibility of the client, and should it be necessary to invoke this clause, a written cost estimate will be provided to the client for approval before work is performed.
 - The charges above do not include applicable taxes. All taxes levied or imposed now or hereafter by any governmental authority will be paid by the client in accordance with the law.
 - When, in EBE/CMS's opinion, shop reconditioning or work beyond the scope of this agreement is required, a written cost estimate will be provided to the Client. If authorized, a separate invoice will be rendered by EBE/CMS.
 - This agreement is not transferrable by the client unless given written consent from EBE/CMS.
 - This agreement covers only the equipment as written above under "Equipment Under Contract."
 - EBE/CMS is not responsible for returning leased equipment to the leasing company at the end of the lease terms.
 - Networking not included.
 - This agreement may be terminated at any time by EBE/CMS on thirty (30) days written notice. Customer's obligation to pay all charges which have accrued shall survive any termination of this agreement.

Consumables covered under this option are:

- Parts
 Labor
 Drum/Masters
 Developer
 B/W Toner
 Fuser Rollers
 Service Calls
 Staples
 Color Toner
 Color Developer
 Color Drums
 Waste Containers

Not covered: Paper and Delivery Charges. Consumables will be supplied at no extra charge up to the contracted copy usage. Should copies exceed the contracted copy limit prior to the expiration date, customer may choose to: a) renew this contract upon date of overage b) pay for the supplies and service calls as necessary until the expiration date

Jane Ike
Town Clerk
Hector Town Hall
5097 NYS Route 227
Burdett, NY 14818

Dear Ms. Ike:

This letter is to inform you of our intent to accept a land donation from the Finger Lakes Land Trust that comprises approximately 5.89-acres located in Hector, New York within Schuyler County (see attached map). The land adjoins the Green Mountain and Finger Lakes National Forests (GMFL) and will be administered as part of the Hector Ranger District.

The parcel will be managed in accordance with the *Finger Lakes National Forest Land and Resource Management Plan* (Forest Plan). Acquiring this property meets a variety of Forest Plan goals and desired conditions. This includes consolidating public ownership to facilitate natural resource restoration and conservation of watersheds and wildlife habitat. It also increases access to multiple-use opportunities such as hunting, and wildlife viewing.

The land donation is adjacent to the GMFL on two sides and is characterized by a diversity of native tree species and understory vegetation. The donation parcel will be an important addition to the GMFL increasing management efficiency and road access. Therefore, it is in the public's interest to acquire.

If you have any questions about this donation of land, please contact Realty Specialist Cassi Spires at (802) 747-6743 or cassandra.spires@usda.gov.

Sincerely,

X

Engineering Planning Grant (EPG) Program Sample Resolution Language

Applicants with Engineering Planning Grant (EPG) projects selected for funding will need to provide a Resolution that:

1. Authorizes a designated representative (by Title only) to execute the EPG Agreement; and
2. Authorizes expenditure of project costs and local match funding requirements.

Sample 'Resolved' clauses are provided below. The language in the resolution should conform to the applicant's particular EPG project.

THIS SAMPLE LANGUAGE IS ONLY FOR THE PURPOSE OF ASSISTING YOU IN DRAFTING YOUR RESOLUTIONS AND DOES NOT CONSTITUTE LEGAL ADVICE. LOCAL COUNSEL SHOULD BE CONSULTED PRIOR TO ADOPTING ANY RESOLUTIONS.

If you have questions, please contact the New York State Environmental Facilities Corporation at 518-402-7461.

Authorization for Designated Representative to Execute Grant Agreement (Sample)

NOW, THEREFORE, BE IT RESOLVED, the *(designated representative by Title)* is hereby authorized to execute an Engineering Planning Grant (EPG) Agreement with the New York State Environmental Facilities Corporation (NYS EFC) and any and all other contracts, documents, and/or instruments necessary to facilitate the EPG project referenced herein and to fulfill the *(name of municipality's)* obligations thereunder.

Authorization and Appropriation of Local Match (Sample Resolved Clause)

*Local match is a minimum of 20% of the total EPG grant award.

NOW, THEREFORE, BE IT RESOLVED, the *(name of municipal entity)* hereby authorizes and appropriates a minimum 20% local match as required by the Engineering Planning Grant Program for the *(insert project's name/description here)* in the amount of \$ *(local match)* and based upon the total EPG Grant award of \$ *(grant award)*.

BE IT FURTHER RESOLVED, the source of the local match, and any amount in excess of the required match, shall be provided by *(state the full plan of finance for the local match being supplied by Recipient – for example, BANS, bonds, general fund, in kind services, co-funding sources)*.

RESOLUTION SUPPORTING THE CLOSURE OF SENECA MEADOWS, INC.
AND URGING THE STATE TO ENFORCE THE NEW YORK STATE SOLID WASTE MANAGEMENT PLAN (2023-2032)

RESOLUTION #

WHEREAS, Seneca Meadows, Inc. (SMI) is seeking to increase the life of its existing landfill ("Landfill") located at 1786 Salcman Road in the Towns of Seneca Falls and Waterloo, Seneca County, New York; and

WHEREAS, the project would add approximately 47 million cubic yards of air space used for the disposal of non-hazardous residential, commercial, institutional, and industrial wastes in the proposed SMI Valley Infill Area ("Valley Infill"); and

WHEREAS, The Valley Infill will involve the construction of approximately 47 acres of newly lined landfill area, as well as overfilling above approximately 191 acres of currently permitted landfill area, including the toxic Tantalum Superfund Site and increasing the existing maximum permitted Landfill height by about 70 feet; and

WHEREAS, the type of waste being received at the facility (Municipal Solid Waste) and the approved design capacity of the Landfill, which is 6,000 tons per day, would not change, however, Landfill operation would be extended approximately 15 years, depending on the waste volume received in a given year; and

WHEREAS, the impacts of the Landfill expansion reach beyond the immediate location, and are incompatible with the health and community character of the Finger Lakes region for numerous reasons including: regular, heavy truck traffic to and from the existing Landfill site which impacts regional roadways in Finger Lakes and including the Town of Hector, emissions of unmitigated noxious odors and hazardous air pollutants, and production of PFAS and other toxin-laden leachate shipped to wastewater treatment plants; and

WHEREAS, The Town of Hector is not currently named as an interested party, however the residents of the Town of Hector will be affected by the award of approval or by failure for SMI to receive approval; and

RESOLUTION #

NOW, THEREFORE BE IT RESOLVED, The Town of Hector does hereby support the closure of SMI in 2025 as is currently planned and permitted, without further modifications to the facility; and

~~BE IT FURTHER RESOLVED, That the Town of Hector seeks to be named an interested party due to the potential impacts on our community and therefore requests an enhanced public participation process for any proposed expansion; and~~

BE IT FURTHER RESOLVED, that the State of New York must implement its own Solid Waste Management Plan that will better manage the volume of waste relegated to landfills; and the Town of Hector supports the passage of the Packaging and Recycling Infrastructure Act, to induce increased use of the other options including reuse, recycling and reducing waste generated in the production of goods for public and organizational consumption.

BE IT FURTHER RESOLVED that the Town of Hector directs the clerk to forward a copy of this resolution to the NYSDEC; NYS Assembly member, Phil Palmesano; NYS Senator Tom O'Mara; the Town Boards of Seneca Falls and Waterloo and the Seneca Falls Zoning Board of Appeals; the Seneca County Board of Supervisors and the Schuyler County Legislature.

Dear Town of Hector Representative,

We are pleased to inform you of the formation of the Hector Foundation, Inc., a nonprofit 501c3 organization. Our mission is to host community organization events and raise money for the local fire company, food bank, scholarships, and community projects. The Hector Foundation strives to inspire and motivate the Hector community to create a family-centered environment for existing and future members of our community.

In 2024, our main fundraising event, The Hector Family A-Fair, will be expanding to a two-day event scheduled on August 2nd and 3rd, with a majority of the funds raised to be donated to the Valois Logan Hector Fire Company. We hope you come as a patron to our community event.

We look forward to having the support of our local representatives in this new venture that aims to bring our community together.

Thank you for your efforts in helping us build a stronger and healthier community.

Sincerely,

The Hector Foundation Executive Committee

Abigail Ganton, President

Kylie Rodrigues, Treasurer

Jennifer Clark, Vice President

Hilary Niver-Johnson, Secretary
